350. Intersection of Two Arrays II

Solved

Easy Topics Companies

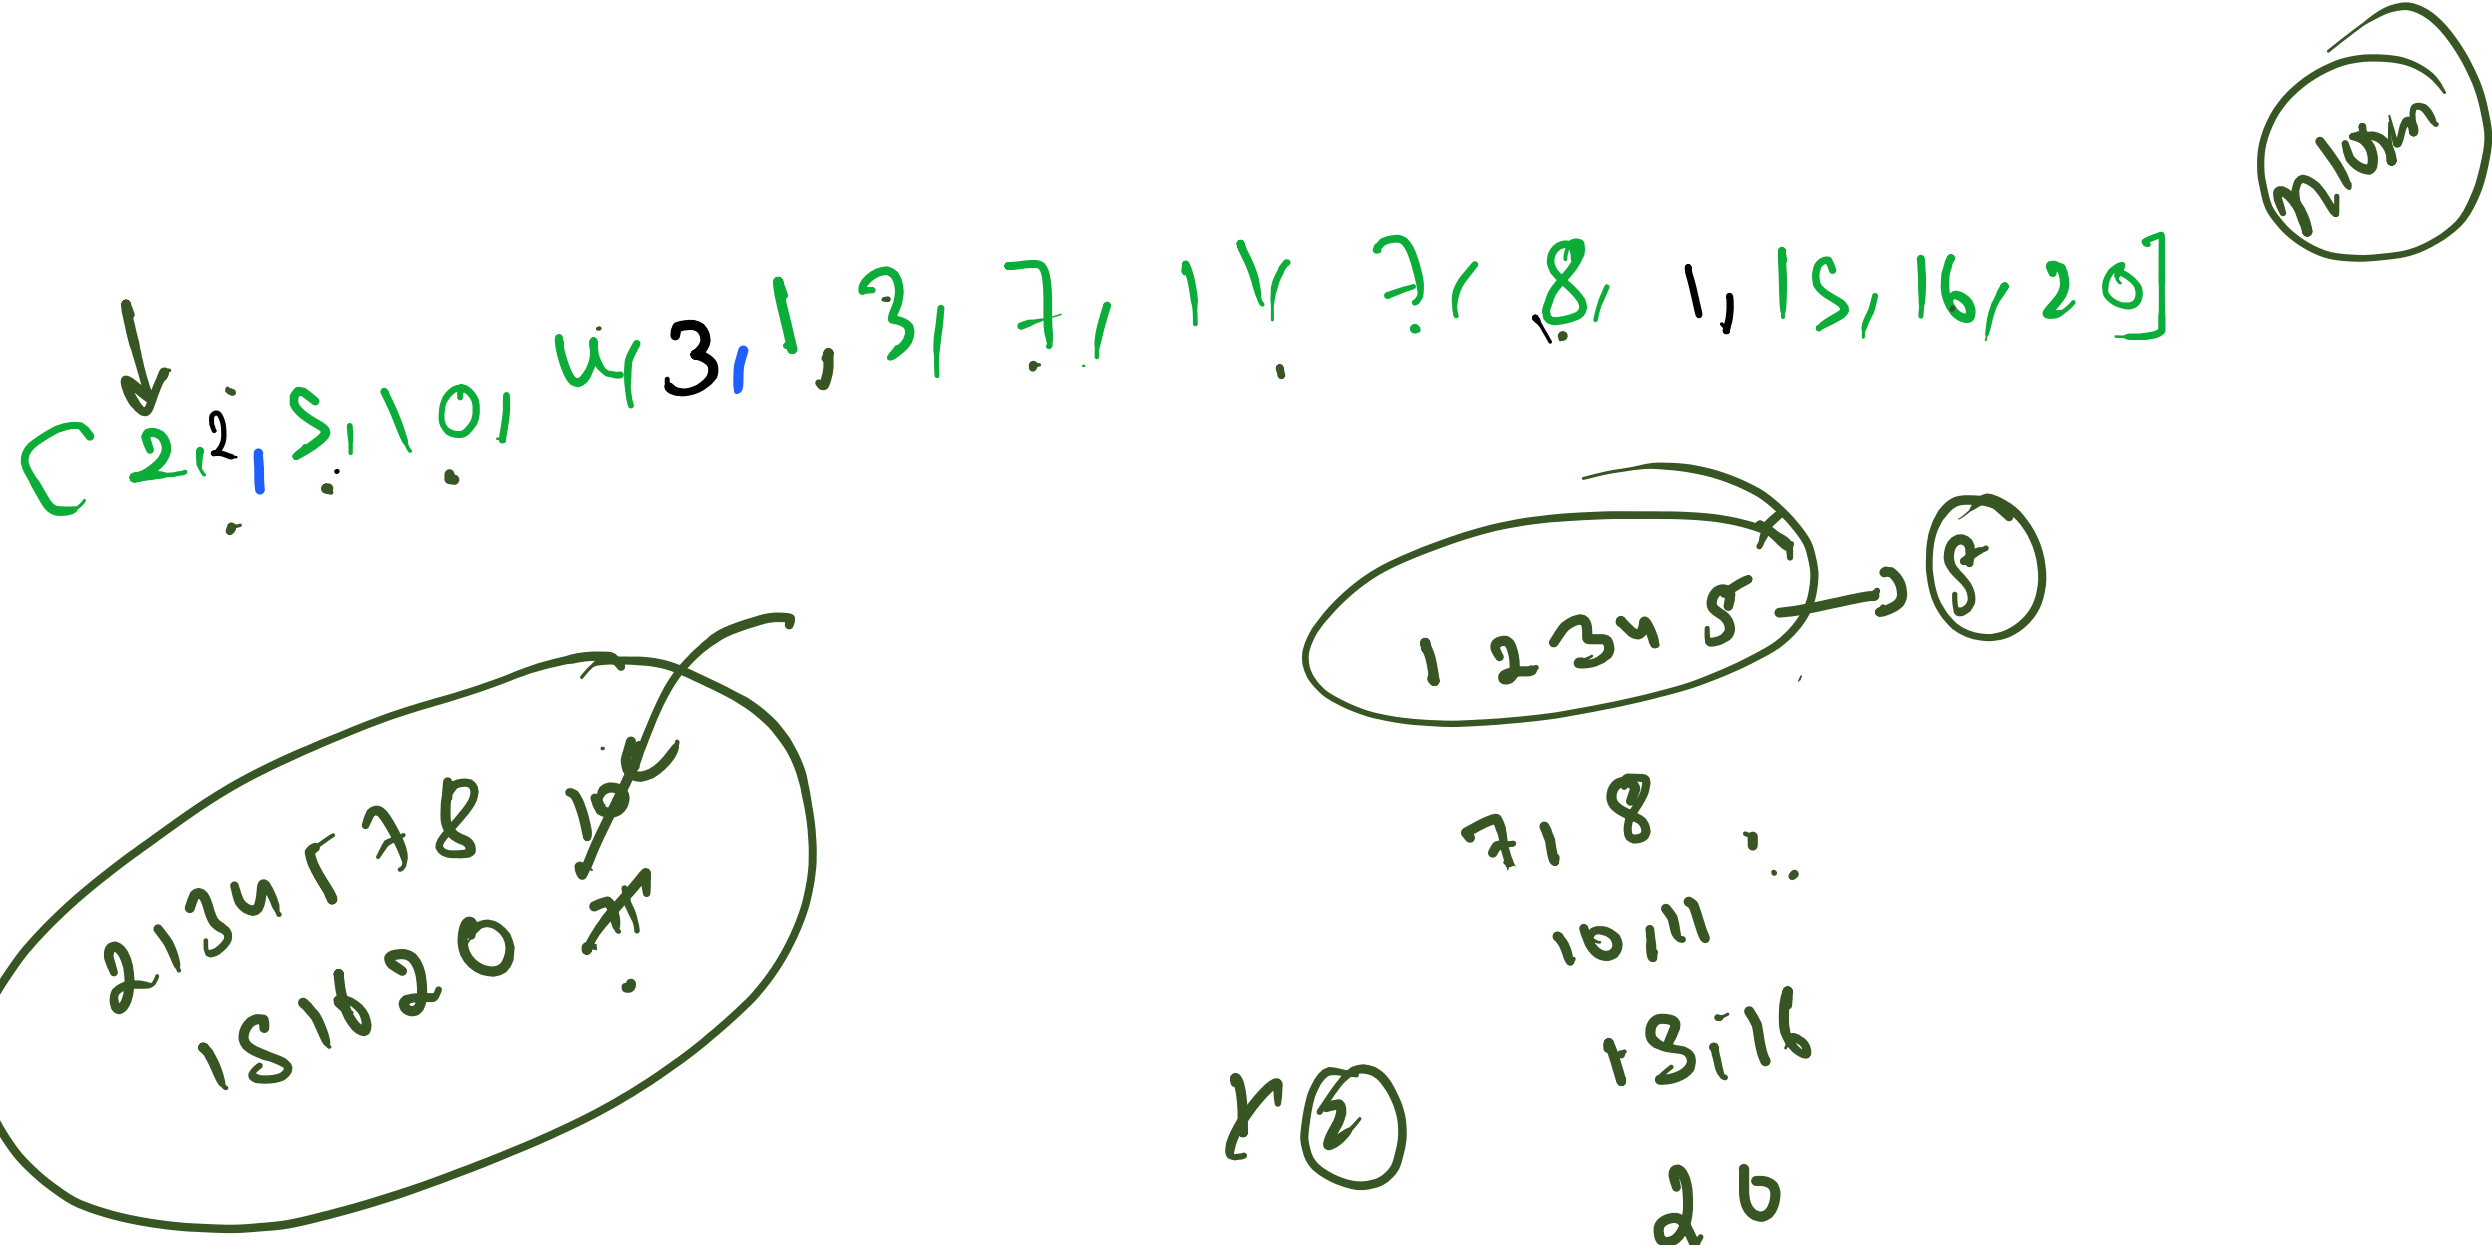

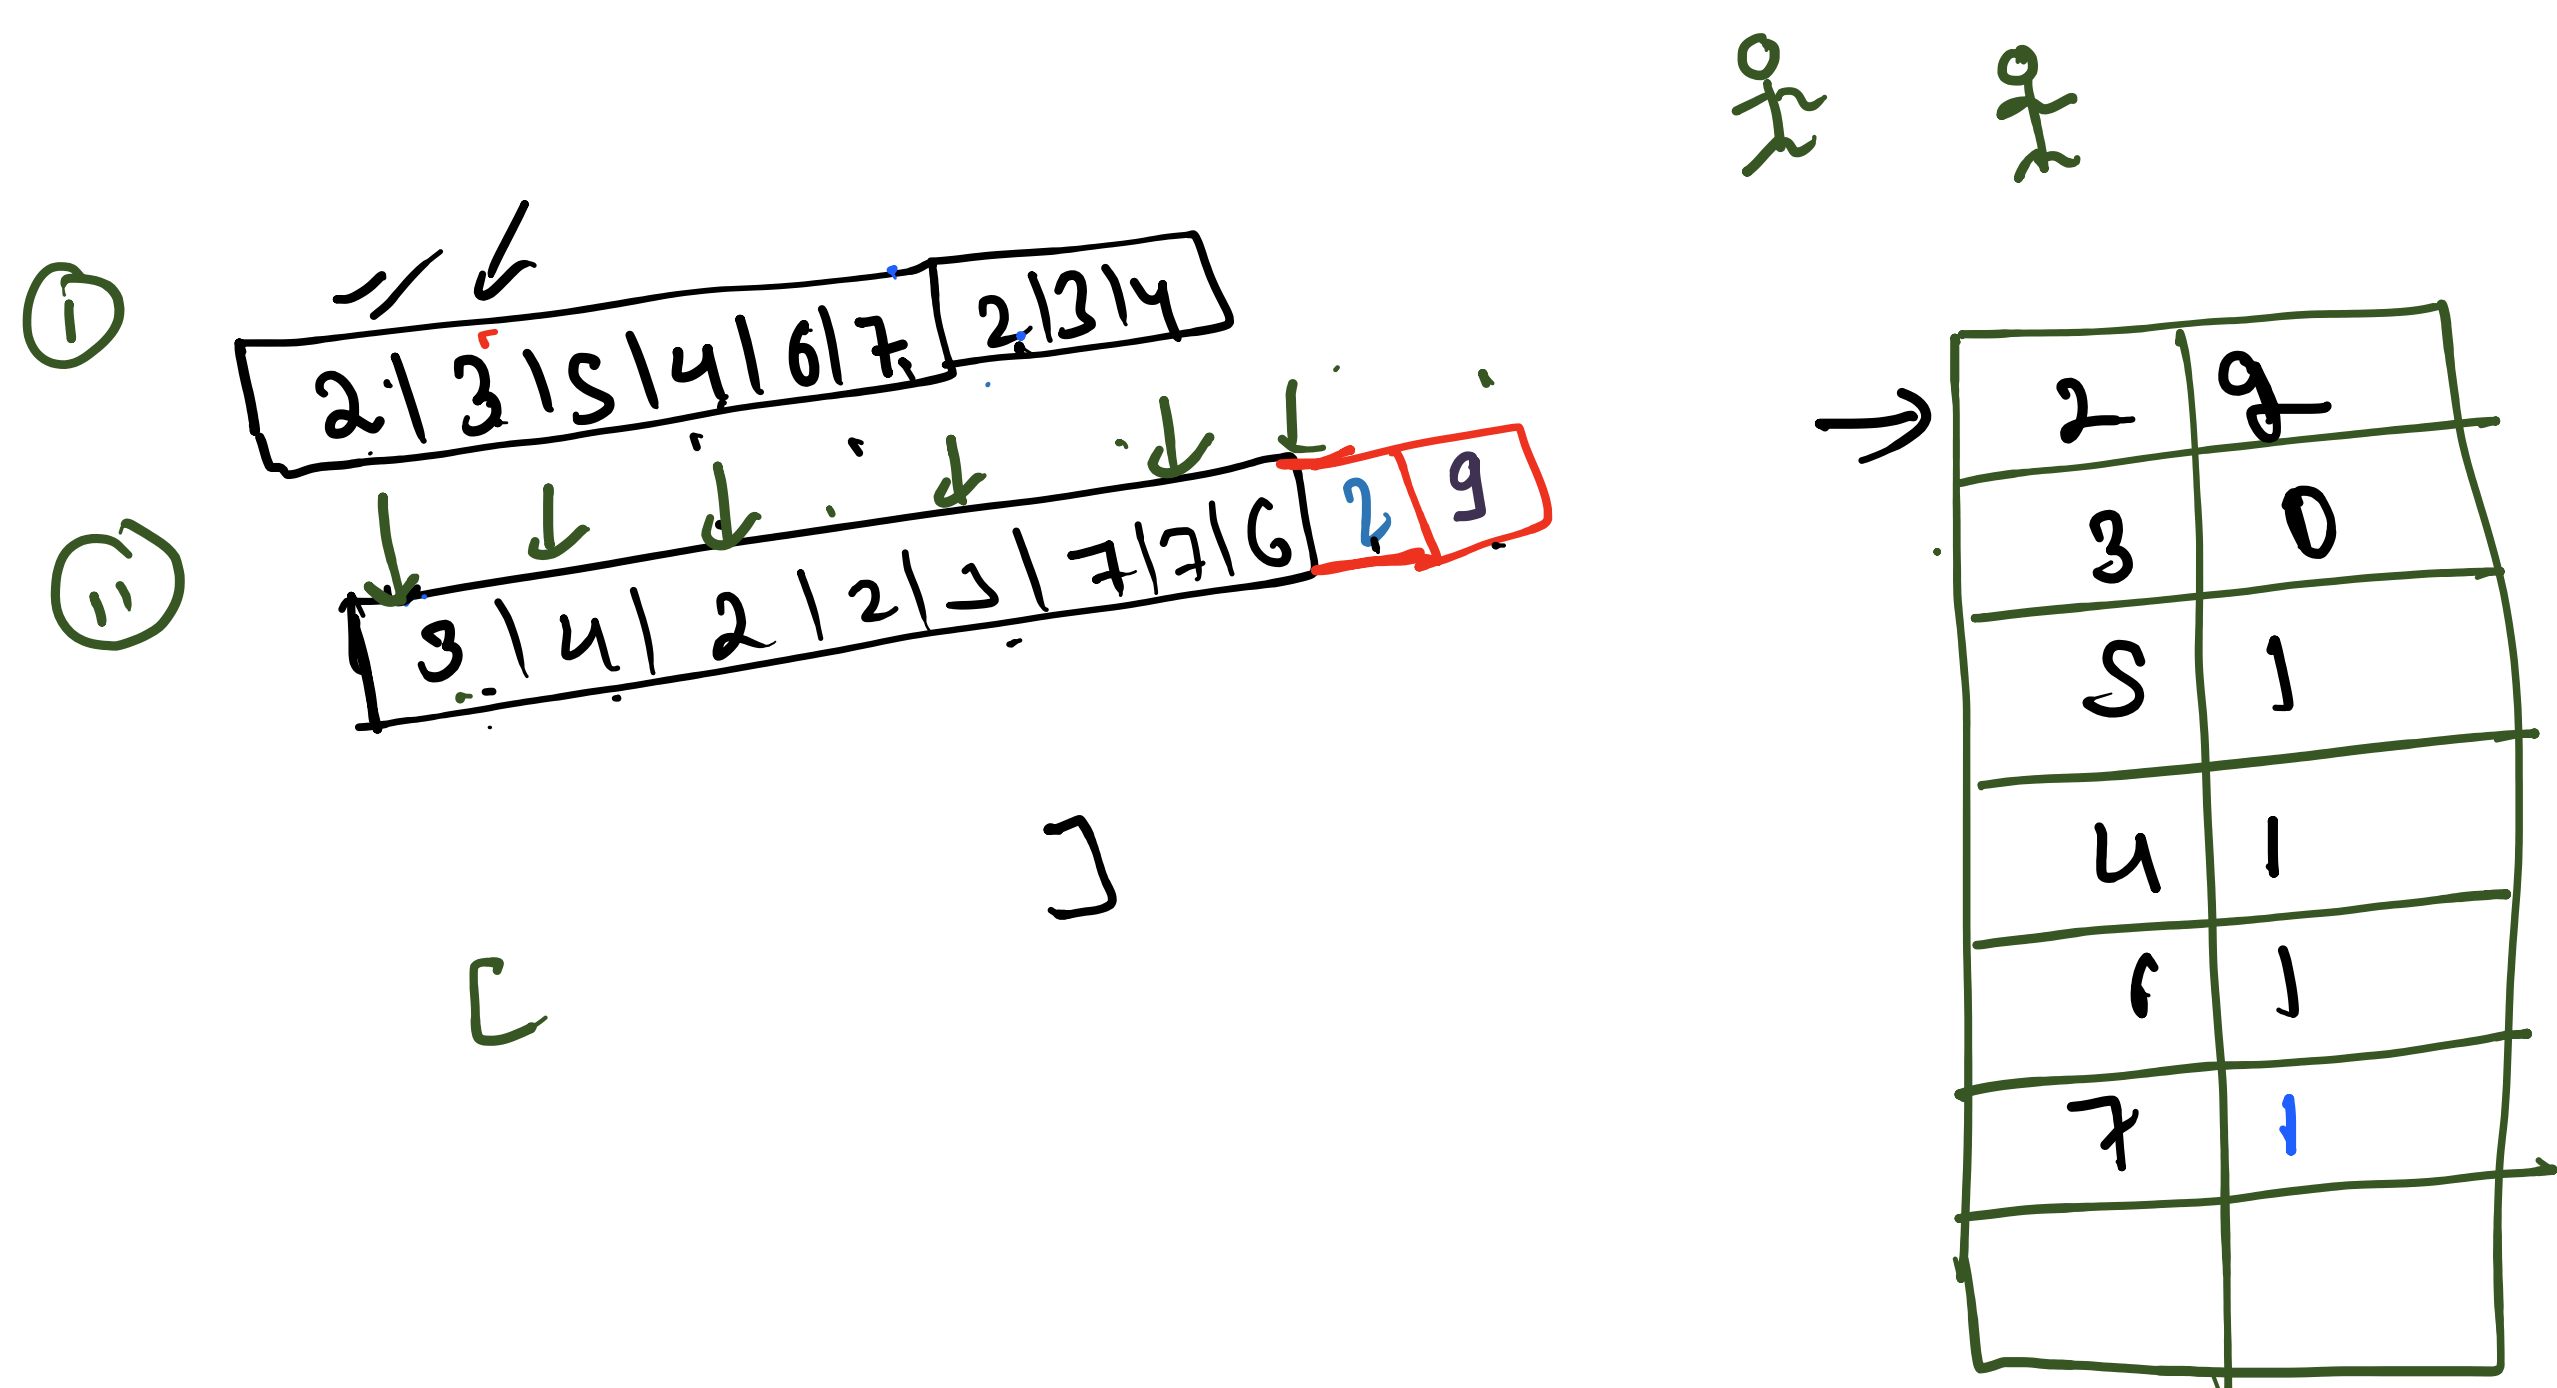

Given two integer arrays `nums1` and `nums2`, return an array of their intersection. Each element in the result must appear as many times as it shows in both arrays and you may return the result in **any order**.

Example 1:

Input: `nums1 = [1,2,2,1]`, `nums2 = [2,2]`
Output: `[2,2]`

Example 2:

Input: `nums1 = [4,9,5]`, `nums2 = [9,4,9,8,4]`
Output: `[4,9]`
Explanation: `[9,4]` is also accepted.

```
if(set.contains(x) && !set.contains(x-1)) {
    int c=0;
    while(set.contains(x)) {
        set.remove(x);
        c++;
        x++;
    }
}
```
